

H4 Video Intercom

The H4 Video Intercom integrates a 3 MP fisheye camera with a high-performance intercom and features exceptional wide dynamic range, low-light, noise reduction, and echo-cancelling technologies for clear viewing and two-way communication with visitors. Combined with Avigilon Control Center (ACC) video management software, this secured entry system enables operators to quickly and easily identify and communicate with a visitor before remotely granting access. The H4 Video Intercom also supports Avigilon Appearance Search[™] technology, which enables security operators to locate a specific person of interest quickly across all cameras on a site.

The H4 Video Intercom serves as a first line of defense for facilities where securing main entry points is critical. It can help schools verify campus access, provide parking entry to approved guests at hotels, and offer after-hours entry to retail staff. By providing and restricting access, the H4 Video Intercom helps enhance security while also maintaining convenience.

The innovative weather-, vandal-, and tamper-resistant, aluminum housing and adapter easily fit installations on walls and door frames, both indoors and outdoors. Its 3 MP wide-angle camera provides exceptional image quality even under challenging conditions with LightCatcher[™] technology, triple exposure, true Wide Dynamic Range (WDR), and adaptive infrared (IR) technologies. The integrated, single-button intercom provides an easy way to communicate with your Avigilon Control Center[™] client for entry control. Digital inputs and outputs can easily interface to any door locks. The camera uses HDSM SmartCodec[™], Idle Scene Mode, and patented High Definition Stream Management (HDSM)[™] technologies to reduce bandwidth and storage while maintaining high image quality.
